## Profile

I am a business minded iOS development professional, that is quick to adapt, and has an eye for the user experience. I have developed everything from ad-serving iPhone SDK's to lead generation web services, budgeting apps to social media apps that leverage a Graph API, and many other things in-between. Besides my tangible skill set, I have proven myself to be a leader and hard worker over my job history. If you have any questions, feel free to contact me at the email address or phone number listed above. I look forward to exceeding your expectations.
